

Alan Regaya - Web Developer Portfolio

Introduction

I'm Alan Regaya, a full-stack web developer with over 3 years of experience specializing in WordPress, WooCommerce, Elementor, and front-end technologies. I create responsive, SEO-optimized websites that balance performance and user experience. My goal is to build sites that are not only visually appealing but also effective and maintainable.

Featured Projects

Byron Bay Candles - <https://byronbaycandles.com>

An elegant eCommerce site focused on showcasing natural candle products. I handled major front-end customization using Elementor and optimized for mobile responsiveness, speed, and SEO.

Tech Stack: WordPress, Elementor, WooCommerce, GA4, GTM

Gourmet Basket - <https://gourmetbasket.com.au>

A complex WooCommerce platform for a luxury gift delivery brand. I improved checkout flows, implemented SEO metadata, and collaborated with designers to fine-tune UI elements.

Tech Stack: WordPress, WooCommerce, SEO, Custom JS

Tuna Fish Tackle - <https://tunafishtackle.com>

A niche sporting goods site with a high-performance layout. I worked on integrating product filters, optimizing loading times, and managing plugin configurations.

Tech Stack: WordPress, Elementor, Performance Optimization

Alan Regaya - Web Developer Portfolio
